---

This course is designed for the emergency rescue personnel and K9 handlers that would respond to K9 emergencies in the field. This course includes practical classroom style education as well as hands-on instruction, demonstrations and scenario specific training using live dogs, Trauma Fx simulator K9 Valor, and model dogs.

- Physical Examination and handling of the healthy & injured K9
- Wound Care: facial lacerations, eye & paw injuries
- Immobilization/Bandaging
- Triage, shock, pain, heat stroke
- CPR - RECOVER BLS & ALS /scenario drills
- Introduction to Hemorrhage control
- Oxygen administration
- Naloxone administration
- Heat Stroke recognition and treatment
- Illicit drug exposure in the working K9
- Toxicology
- Major Trauma overview
- Hemorrhage control
- Review of First Aid kits and recommendations of supplies
