

FIREARMS TRACING & CRIME GUN INTELLIGENCE

Transform basic firearms recovery data into actionable intelligence for reducing violent crime.

This training introduces the ATF National Tracing Center (NTC) and the modernized eTrace and eTrace DIRECT applications, demonstrating how firearms tracing can identify suspects, reveal trafficking patterns, and support violent-crime investigations. Analysts and investigators will learn how to submit and track trace requests in real time, integrate high-volume data using eTrace DIRECT, and apply eTrace search tools and reporting features to analyze time-to-crime rates, source states, and firearm types. The presentation also covers key NTC resources, including the Obliterated Serial Number Program and protocols for Urgent Traces during critical incidents.

**September 9, 2026

PRESENTER

Stacie Alvey

**ATF NATIONAL TRACING
CENTER DIVISION**

Stacie Alvey leads ATF's automated tracing program, eTrace DIRECT, at the National Tracing Center Division, and serves as the Division's Crime Gun Intelligence subject matter expert.

She began her law enforcement career in 2012 with Louisville Metro Police Department (KY), serving as a patrol officer, violent street crimes detective, homicide detective, and full-time ATF Task Force Officer. She joined ATF in 2020 as an Intelligence Research Specialist. Stacie completed ATF's Crime Gun Intelligence Expert Training program and earned multiple honors, including ATF's Outstanding IRS Employee of the Year, ATF's Director's Award, and the Attorney General's Award for Excellence in Information Technology.
