The New Face of Deception

AI SOCIAL ENGINEERING AND PHISHING

Artificial intelligence is changing the way digital deception is created. Learn to spot warning signs, verify suspicious messages, and respond safely before sharing information or clicking a link.

What will you learn?

01

Recognize

AI-enabled phishing and deceptive messages across texts, calls, and content that impersonates people or trusted organizations.

02

Respond

What to do and whom to notify when a message looks suspicious or someone has interacted with it.

DATE AND TIME

December 4, 2026

10:30 AM - 12:00 PM

PRESENTER

Edgardo Murillo

PRVI HIDTA IT Manager

PAUSE BEFORE YOU RESPOND

Recognize. Verify. Report.

The best defense starts with an informed decision.
